

**NEW**

“save time and costs  
with less maintenance”

## Product highlights

- ✓ **Patented ignition system** ensures excellent user-friendliness and immediate start-up
- ✓ **Agrofog Patented dual purposed fog tube** allows for both water-based and oil-based applications interchangeably for a wide variety of applications
- ✓ **Lowest temperatures** at discharge point ensures high safety standards as well as the preservation of chemical (Active Ingredient) integrity
- ✓ **Stainless steel** solution tank, fuel tank, fog tube and solution lines together with other top-quality materials ensure high durability and resistance to wear and tear

## Universal and reliable – Fogger for pesticides and disinfectants

The EVO 35 ACT is a universal thermal fogger designed for most applications, both indoors and outdoors. This unit can be used with all common pesticides and disinfectants. Water-based mixtures of active ingredients can be applied excellently with this device.

- **Vector & Pest Management, Disinfection, Public Health**
- **Plant Protection, Stored Product Management, Bird Management**

The newly designed Advance Carburetor Technology (ACT) ensures unparalleled user-friendliness. Equipped with our unique ignition system without spark plug for the perfect start-up. It is easy to use, easy to maintain and safe. Through the years, its efficiency and reliability has remained unmatched in the industry.

\* **Advanced Carburetor Technology (ACT)**

„The equipment has been found by the International Pesticide Application Research Centre (IPARC) (Imperial College, Ascot, UK) to comply with the requirements of the WHO Equipment for Vector Control specification guidelines WHO/HTM/NTD/WHOPES/2010.9 REVISED EDITION 2010” (EVO35/E)

**Advanced Carburetor Technology (ACT) new carburetor design by IGEBA that incorporates advanced features to improve the efficiency and performance of the engine:**

- IGEBA ACT carburetors are designed with precision German engineering. Its precisely machined parts ensure tighter tolerances that provide greater control over air and fuel flow. This allows for more efficient combustion, resulting in improved engine performance and better fuel efficiency.
- IGEBA ACT carburetors feature better and faster adjustment for stable starts without flame formation. The superior igniting and starting characteristics of these carburetors help to reduce emissions and increase engine efficiency.
- IGEBA ACT carburetors are machined as one single block without the need for additional part components, this offers quicker and easier access for cleaning and maintenance. This single block design greatly reduces servicing costs as the need for replacement of additional part components is nullified.

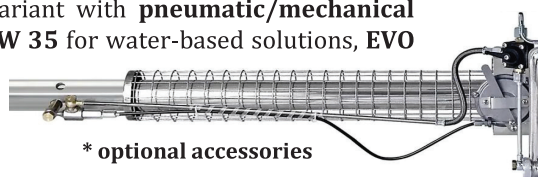

## Technical Specifications

EVO 35 ACT	
Dimensions in cm (LxWxH)	136 x 27 x 34
Weight, empty in kg	7,9
Solution tank capacity in l	5,7
Fuel tank capacity in l	1,2
Performance combustion chamber in KW/HP	18,7 / 25,4
Fuel consumption l/h approx.	2
Average flow rate in l/h (oil based)	20
Max. flow rate in l/h (oil based)	42
Flow rate with water in l/h	10
Efficient horizontal reach in closed rooms using water and carrier in m	40
Efficient horizontal reach in closed rooms using water in m	8
Energy supply	4 x 1,5 V batteries LR20, optional LR6
Pressure in solution tank in bar approx.	0.3

## Versions

EVO 35 Standard, EVO 35 E variant with **pneumatic/mechanical solution cut-off device**, EVO 35 W 35 for water-based solutions, EVO 35 W 35 L for water-based solutions in acid-proof design

\* optional accessories
