

# EcoMenger<sup>®</sup>

Formerly as EcoRaider

# NATURAL ALL PURPOSE INSECT SPRAY

Fast Kills and Repels  
All Types of Invasive Bugs

# LAB + FIELD PROVEN

EcoRaider's performance is proven by lead universities' independent studies.

“Observed  $92 \pm 3\%$  knockdown rate of the adult mosquitoes tested in 30 minutes”

“The only natural product among all 12 tested that causes 100% mortality of bed bugs.”

“Immediately killed all ants present on the trail and prevented any new ants... effective for up to 4 weeks”

---

*\* EcoRaider is currently under new brand name EcoVenger.*

## THE SCIENCE BEHIND

EcoVenger's plant-extracted active ingredients effectively block the Octopamine receptor that only exists in invertebrates.

Insects are invertebrates while humans, animals, birds and fish are vertebrates; EcoVenger's mode of action causes immediate paralysis and death of the insects without affecting vertebrates.

The active ingredients quickly penetrates the cuticle and breaks down the insect neuron transmitter system irreversibly.

# HOW TO USE:

## ► For Bed Bugs:

EcoVenger quickly kills bed bugs and their eggs with extended residual protection, including resistant bed bugs immune to traditional pesticides.

For personal protection in hotels, theaters, public transportation, etc. Spray bed frames, headboards, mattresses, sofas, couches and surrounding areas to kill existing bed bugs and eggs. Spray on luggage to prevent bed bugs. Spray on clothing to avoid hitch-hiking bed bugs

## ► For Mosquitoes:

EcoVenger effectively repels *Ae. albopictus* (Asian tiger mosquito) and *Ae. aegypti* (yellow fever mosquito). It quickly kills 100% of adults and larvae with extended protection.

Spray anywhere mosquitoes are spotted. Spray directly on flying mosquitoes to kill them on contact. Spray around areas where mosquitoes need to be repelled. Spray on clothing, screens, windows, doors and around perimeter of a residence or camping area to repel and to kill adult mosquitoes. Spray into stagnant water bodies to kill larvae and cut down mosquito population.

## ► For Ants:

EcoVenger quickly kills ants. It ruptures ants trail and prevents regrouping.

Spray areas where ants appear. Spray directly to kill on contact. Spray along ant trails especially entry points and around the perimeter of a residence, including shrubbery, vegetation (caution leaf burn), foundation, vinyl, aluminum and wood siding, decks, doorways and patios. Spray at the entry of the garage and around garbage cans and recycling bins.

## ► For Other Insects

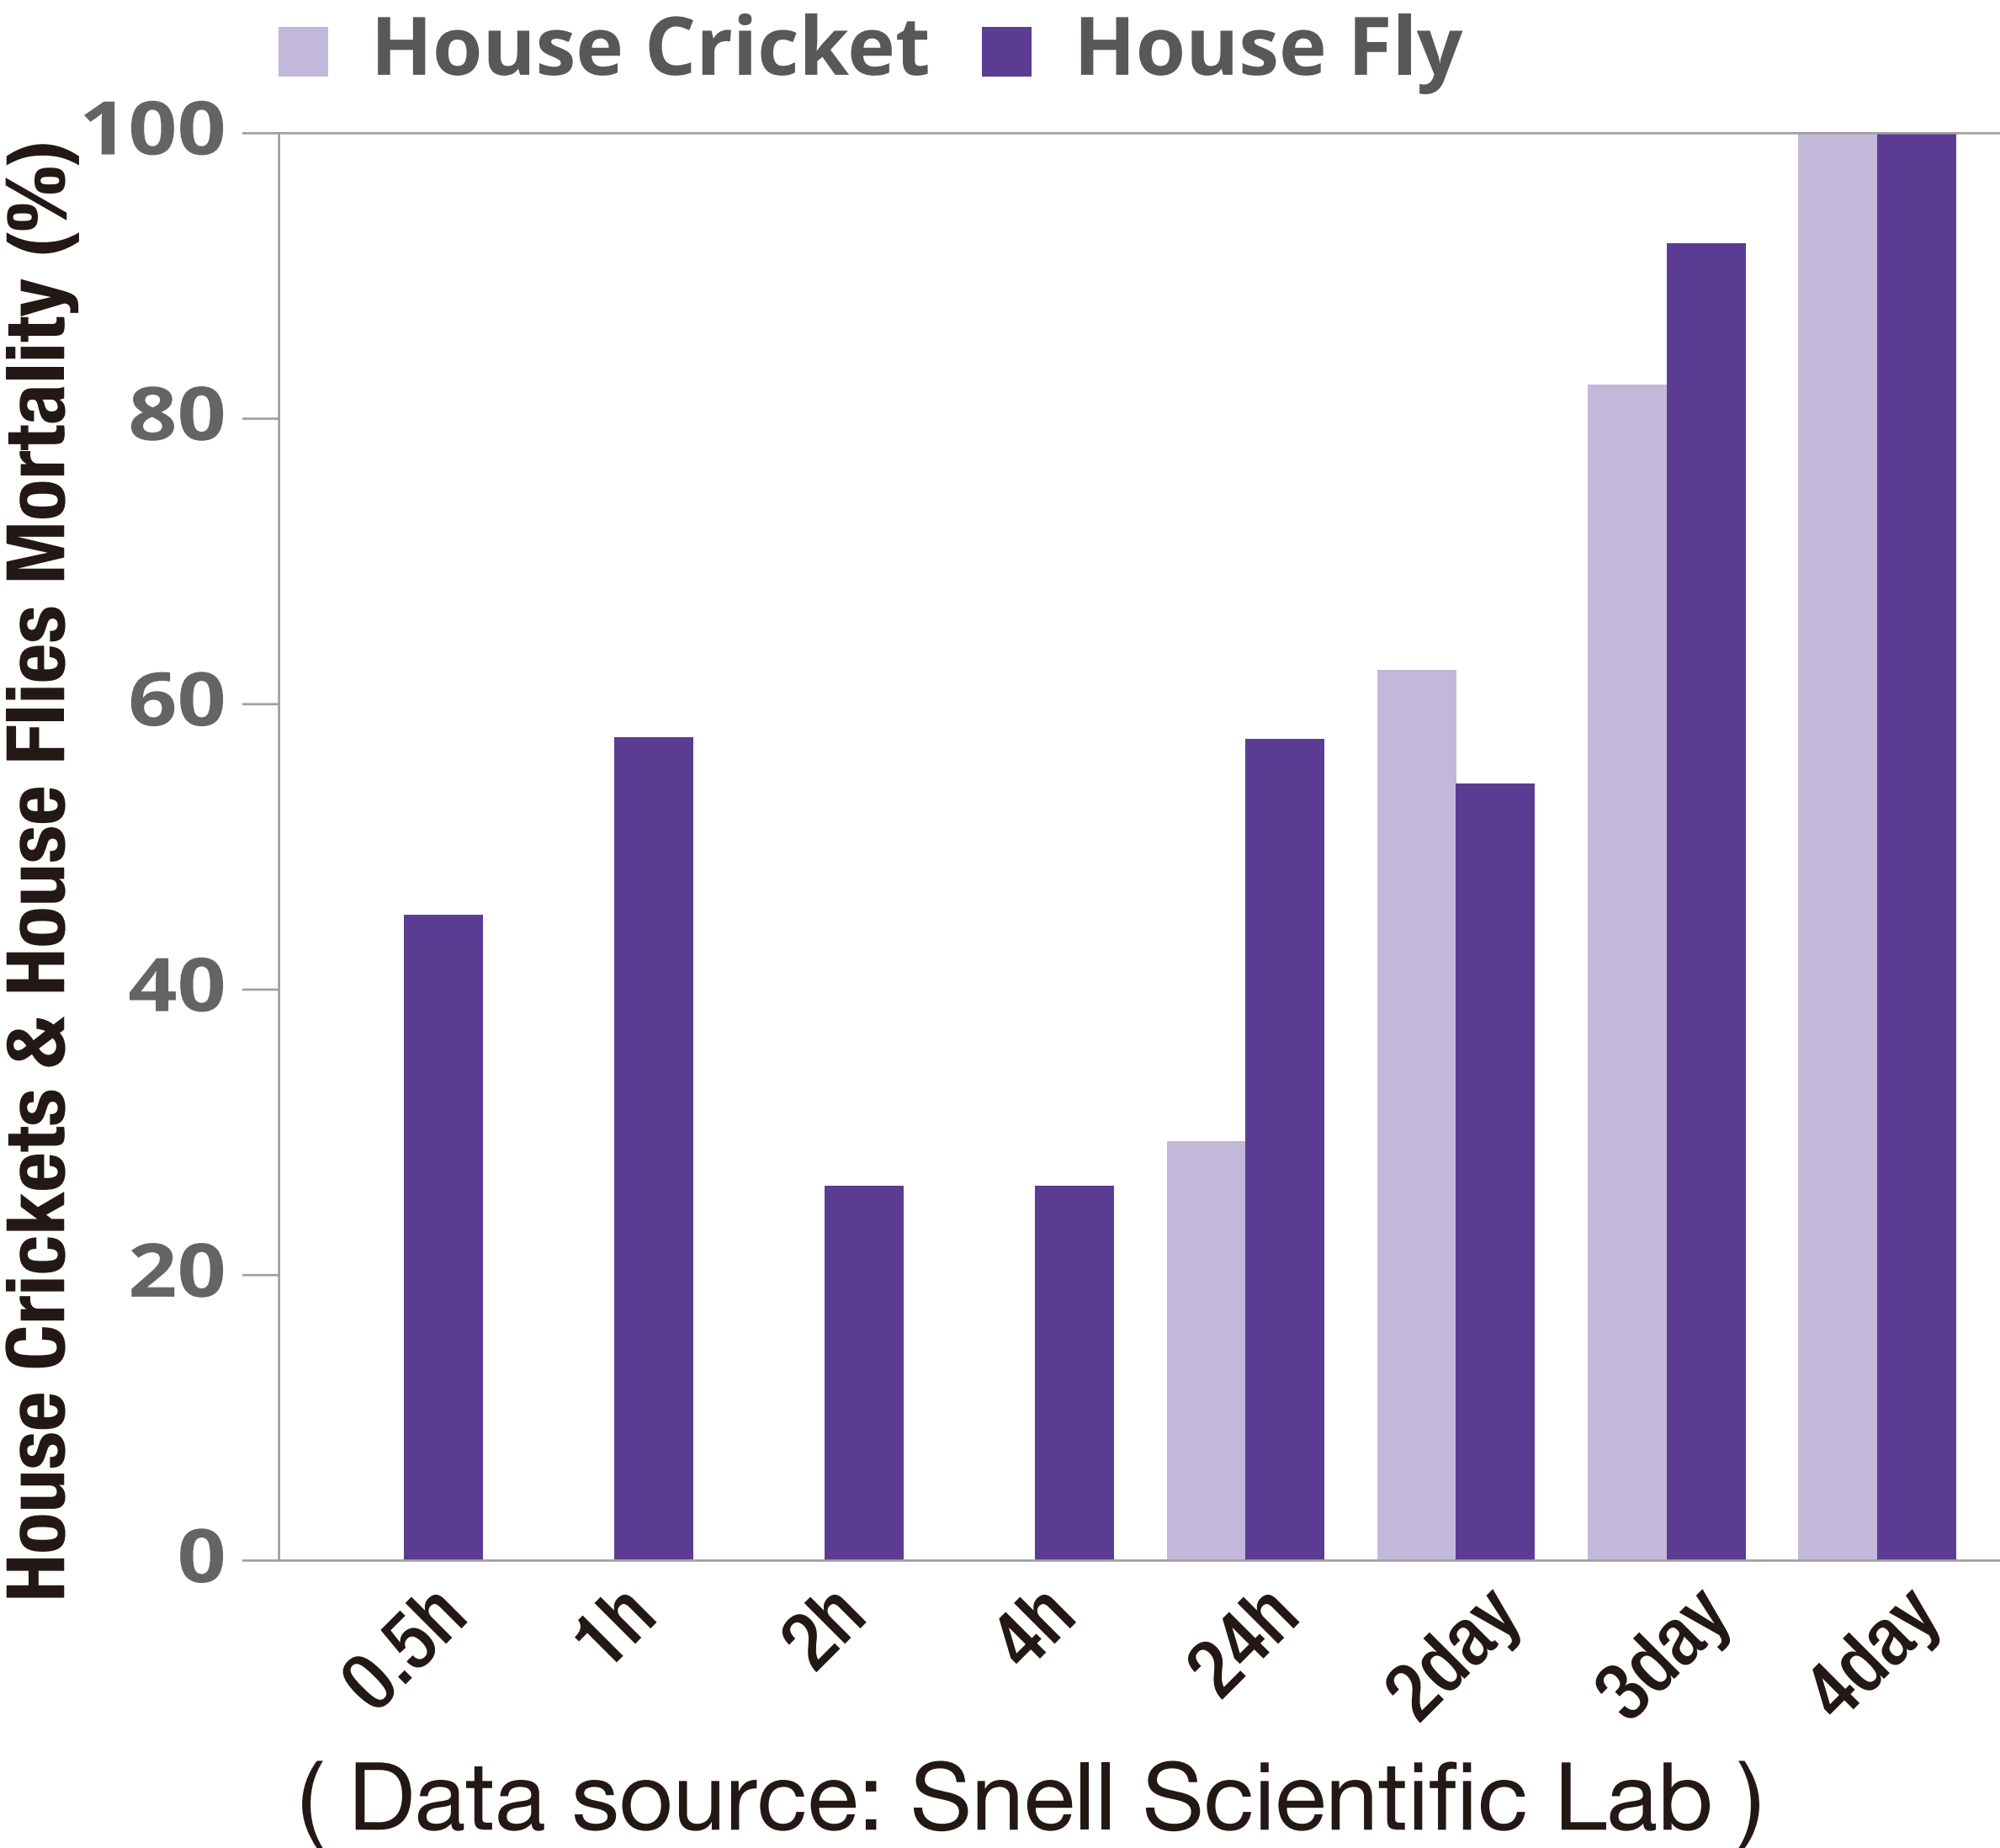

EcoVenger can also be used to control beetles, crickets, dermestids, fleas, flies, gnats, lice, midges, mites, moths, silverfish, spiders, springtails, stink bugs, ticks and other insects.

Spray areas where insects are found or normally occur, including around sinks and plumbing, near appliances, behind cabinets and around waste containers. Repeat as necessary.

EcoVenger is a natural, non-toxic and minimum risk bio-insecticide and is safe around children and pets.

# Mortality Against House Crickets & House Flies

# Mortality Against Silverfish
