

# Art. 363G ROUND STERILIZER

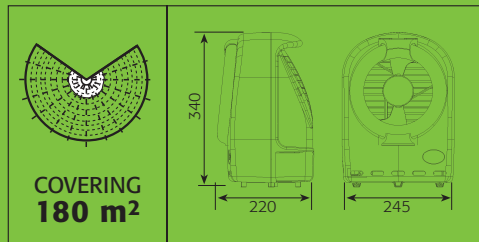

Aqua in colour, this is similar to model 361. Equipped with an internal lamp (UV-C) with germicidal action, it sterilizes insects caught in the drawer, from microbes and bacteria. This model has been designed to solve sanitary and environmental problems. It is perfect for restaurants, shops producing or selling food, hospitals and everywhere it is necessary to remove microbes and bacteria from the environment.

### THE FAN MOTOR WORKS AT TWO SPEEDS:

The first speed, slower and very silent, is suitable for catching insects such as mosquitoes during the night, in absolute silence.

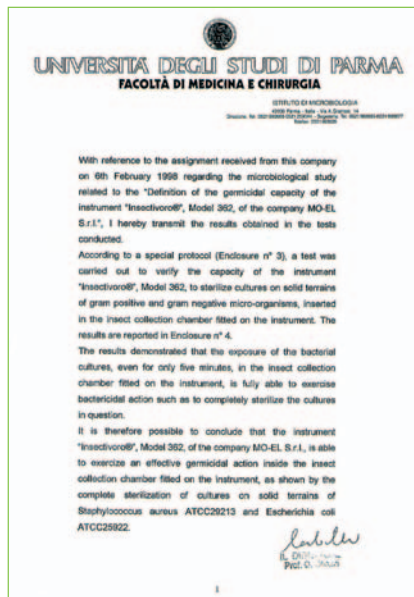

The second speed is faster, and suitable for daytime use, as it overcomes resistance to the biggest insects, such as flies, gadflies, bugs and so on...

COVERING  
180 m<sup>2</sup>

TECHNICAL FEATURES	
Structure	ABS
Dimensions in cm	24,5x22x34 cm (H)
Weight	2,4 Kg
Power supply	230V/50Hz
<b>UV-A lamps</b>	<b>1x32 W</b>
Lamp life	2000 h
<b>Internal germicide UV-C Lamps</b>	<b>1x9 W</b>
Motor speed	900/1050 rpm
Insulation	<input checked="" type="checkbox"/> Doppio cl II
Total consumption	55 W

CERTIFICATE: test of appliance germicide efficiency
