

Experience the extraordinary toughness

Termi Tool (Sub-slab Injector)

use
for PROFESSIONAL

The newly developed sub-slab injector TERMI-Tool is a professional injector delivering liquid termiticides accurately and efficiently through slab into the soil, blocks and concrete. It comes complete with a variety of tips for application to different structures and materials.

Features:

- Heavy-duty shut off valve
- Most effective and versatile with current termiticides
- Variable configurations for great flexibility
- Dual-coupling sizes for different external attachments
- Dual-length stainless steel pipe sets with foot ram assembly
- Built-in dripfree check valve for void tips

Optional Accessories:

TERMI-Tool can be easily connected to an in line flow meter with built in digital display for precise measurement of volume discharged by injection tool.

Multiple variety of stainless steel tips for wide range of application
