

XAG R150

Unmanned Ground Vehicle EV

A Nimble Agricultural Robotic Platform for Effortless Farmwork.

Autonomous Operation

RTK centimeter-level high accuracy

Strong Momentum on Field

Electric powered to reduce fuel

Multi-functional Design

Swap payloads for mowing, plant protection, transportation

Easy to Control

Two-handed remote controller, or one tap to operate on App

Autonomous Robotic Platform

Tough but Agile

- Strong and durable with multiple protections
- Compact and flexible vehicle with 7 N·m rated torque
- Freely move through orchards and fields, adapting to different application scenarios

Quick and Smart

- RTK centimeter-level positioning for autonomous precise operation, saving labor
- Strong algorithm enables fast response, smart route planning for worry-free driving

XAG SuperX 4 Pro
Intelligent Control System

Simple to Operate

- One tap to operate on XAG One App, accurately conduct various route modes
- Easy to control with XAG Agricultural Remote Controller 3, remain powered for 5-6 hours

Multiple Task Systems

XAG RevoSpray Ground

360° atomization spray, adjustable droplet size, 150 L large capacity, and 12m max. spray width¹, all for omnidirectional precise coverage to avoid waste

XAG RevoMower

Fully autonomous mowing with variable speed, adapted to different plant heights, no manual operation required

XAG HydraulicSpray

Single pump flow up to 17 L/min² for larger covered areas, adjustable spray bars and nozzles for enhanced adaptability to meet personal needs
